The “Molnija” (Lightning) watchmaking company was founded in 1947 and to this day continues to bring together the best watchmakers throughout Russia. The company is centered upon a commitment to producing watches and calibers of the highest precision. Our watches are the symbol of reliability, accuracy, and an unshakeable reputation. Our chronographs are designed for aeronautical application, stand up to extreme temperatures and pressure, and for decades have served as a crucial link in Russian aviation.

The historical roots of the company reach back into the 19th century and trace back to the legendary American watchmaking firm Dueber-Hampden. Dueber-Hampden was founded in 1877 through a merger with the Wright Brothers’ factory, the very brothers heralded as the inventors of modern aviation. Dueber-Hampden existed for more than 40 years and to this day continues to be recognized as a symbol of American precision engineering and watchmaking. The company was a major player in the growing American economy and has made its mark in history as the largest American watchmaker.

Although the great depression led to the end of production in the USA, due to an agreement between the USSR and the United States this one of a kind technology was purchased, shipped, and put back into production on the First and Second Watchmaking Factories in Moscow.

During the Second World War the First Watchmaking Factory was evacuated from Moscow to the Urals, and in 1947 resumed production as the firm "Molnija". By the end of the 1940s the firm was producing aeronautical timepieces and chronographs for the defense industry. The production of these timepieces has become the main task of the factory ever since. The history of the firm is deeply intertwined with the history of Russian aviation. First appearing in the cockpit of the legendary MIG-15 jet fighter, our timepieces quickly confirmed their reputation for quality, and by the 10th year of production the factory was producing over 30 thousand specialized watches, and our first aviator's watch became widely known.

In addition to specialized production, the factory also perfected timepieces for the civilian sector, such as pocket watches and interior clocks. It was these models that allowed our company to

become one of the most famous in Russia, as well as in the USA, Germany, Turkey, Austria, and even Switzerland.

We continue to carry out this legacy even today. Our cases and mechanical components (including balance wheels and springs) are produced in-house. We also do finishing, painting, case plating, dial printing, assembling, and carry out quality assurance. We continue to develop, test and launch production of new calibers, a major move for the company was the relaunch of the 3603 in-house caliber.

A LADIES WATCH WITH CHARACTER

Russian watchmakers and Swiss designers came together to create this dazzling feminine model. Natural mother-of-pearl is used in the design of the two-part dial, and the bezel is decorated with rhinestones, which complements the geometry of the case. You can customize the watch as you wish to suit different situations: a practical leather strap will give the model a delicate touch, while an extra silicone bracelet will add a bit of sport to the look.

Technical characteristics:

- RONDA 715 SWISS QUARTZ MOVEMENT
- FUNCTIONS: HOURS, MINUTES, SECONDS, AND DATE
- 41 MM STAINLESS STEEL CASE
- SAPPHIRE CRYSTAL
- GENUINE LEATHER STRAP WITH QUICK CHANGE FUNCTION
- OPTIONAL SILICONE STRAP
- WATER RESISTANT TO 5 ATM OR 50 METERS
- LIMITED EDITION 500 PCS
